PROFESSIONAL EXPERIENCE

Full Stack Engineer, *OneLiquidity* [🔗](#)

April 2022 – present | Dubai, UAE

- Delivered business-critical financial services that handle multiple concurrent requests by using scalable and fault-tolerant software principles.
- Reduced development time by over 2 hours by developing an automated workflow that sets up the interactive API reference documentation during deployment.
- Improved development team efficiency by over 10% quarterly by leading weekly in-house knowledge-sharing sessions.
- Reduced user complaints by about 15% from previous months by creating over 100 automated test suites that identified logical errors.
- Provided customer technical support, ensuring smooth user experiences and prompt issue resolution.

Full Stack Developer, *ProDevs* [🔗](#)

September 2022 – February 2023 | FCT, Nigeria

- Translated wireframes/designs into working systems with refined user interfaces and experiences.
- Managed a team of frontend interns using agile methodologies to deliver working software solutions.
- Owned 100% of technical leadership responsibilities for over 3 client products and delivered highly functional solutions according to user stories, requirements and design specifications.

Software Developer, *Connexion Group* [🔗](#)

May 2020 – June 2023 | FCT, Nigeria

- Enabled small & medium enterprises to improve daily productivity by over 40% relative to previous methods by developing bespoke business-centric on-premise and cloud-based systems for their needs.
- Improved team effectiveness and efficiency beyond existing standards by recommending and adopting changes in development workflows.
- Boosted client satisfaction by collaborating with clients to effectively translate functional requirements into technical specifications.

Frontend Developer, *Abella TSL*

August 2021 – May 2022 | FCT, Nigeria

- Translated designs into 10+ responsive websites that maintained consistent branding and are optimised for maximum speed and scalability.
- Developed reusable Vue.js components in client-facing web apps that saved over 30 hours of development time per month.
- Provided technical advice and weigh-ins on technical decisions that affected 3 cross-functional teams thereby enhancing company outcomes.

Experienced software developer with 4 years of expertise in building both SaaS and bespoke software solutions. Skilled in developing scalable, event-based systems that efficiently handle high volumes of data and user interactions. Strong focus on clean code and best practices, ensuring maintainability and extensibility of projects. Collaborative team player with a track record of successfully working in cross-functional teams to deliver high-quality software solutions.

SKILLS

Languages

JavaScript (ES6, JQuery), TypeScript, PHP, Python (2.x & 3.x), HTML, CSS

Frameworks

Vue.js, Nuxt.js, Node.js, Express.js, Laravel, Codelgniter

Databases

PostgreSQL, MySQL, DynamoDB, Redis

Version Control/Deployment

Git/Github, Github Actions, Seed CI/CD, Monorepos (Lerna), Envoy

Infrastructure

AWS (Lambda, SQS, SES, SNS, S3 etc.), Serverless Framework, Docker, Linux

Concepts

RESTful APIs, DSAs, TDD, IoC, Microservices, Real-time Services, Event-based Processing

EDUCATION

Bachelor of Science (B.S.) - Computer Science, *University of Manitoba* [🔗](#)

January 2014 – June 2019

Winnipeg, MB, Canada

CERTIFICATES

AWS Certified Cloud Practitioner [🔗](#)

Amazon Web Services (AWS) - Issued Dec 2021, Expires Dec 2024
